

Francesco Flammini got with honours his laurea (July 2003) and doctorate (December 2006) degrees in Computer Engineering from the University Federico II of Naples. Since October 2003 to January 2007, he has worked in Ansaldo STS as a Software/RAMS Engineer in the Verification & Validation unit, specializing in model-based dependability evaluation and testing of real-time control systems. During these years, he has been involved in several ERTMS/ETCS (European Railway Traffic Management System / European Train Control System) projects. Since February 2007, he has worked on the protection of transportation infrastructures against external threats, specializing in risk assessment and design of security management systems. In 2006/2007 he has been an Adjunct Professor of Software Engineering at the Second University of Naples. He currently teaches Computer Science at the University "Federico II" of Naples and serves as the Editor in Chief for the "International Journal of Critical Computer-Based Systems" (IJCCBS, Inderscience Publishers).
